## PROFESSIONAL EXPERIENCE

**10/2015 - present: Jr Software Engineer - Front-end** at NETCENTRIC IBERICA SLU

**Project 1** . In a team of 8 front-end developers and in collaboration with back-end and QA engineers, I worked on a big website project based on Adobe Experience Manager, developing UI components on *HTML-CSS-JS* implementing *SASS*, *ES6* and occasionally *Jade(pug)* templating. I also obtained some experience in BDD Javascript testing, working with *Karma* and *Jasmine*.

**Project 2** . Worked primarily with *Angularjs* but also some extended hands-on *Angular 2* building single page applications for the banking industry. Used *Redux*, and typings (*flow - Typescript*)

**Project 3**. Working with *Nativescript + Angular* building an app for native iOS and Android

---

**11/2014 - 09/2015: Front-end Developer** at WESTWING GmbH

Being part of the SEO IT/Content Marketing team I was responsible for the implementation of all Front-end related tasks with focus on Responsive Web Development and performance. Standard workflow includes but not limited to:

- *Sass* and *Compass* (enhanced various plugins and extensions)
- *Gulp* task manager
- *JQuery* (AMD - require.js)
- *Git* for version control and deployment
- *Wordpress*

Implementing Agile Scrum methodology.

---

## 06/2013 – 10/2014: **Data Management Specialist** at JOBISJOB

As part of the technical department, my role was to ensure the correct integration of incoming data via different channels including XML feeds integration and HTML data extraction (scraping).

Main technologies and tools: *XSLT*, *Xpath*, *Command line* tools and *Shell scripting*. *Jira* for issue tracking and *Kanban* for managing development process

This working experience allowed me to practice the “scientific” part of the web, familiarise with Unix environments, the command line and programming. Gave me confidence to consider myself ready to target full-time frontend jobs.

---

## 2010 – 2014: **Web design & Development**

This period was in a way an unofficial internship in a company I cofounded together with a friend. I worked as Web designer and frontend developer. We were building small websites using Drupal but also Wordpress and Magento for a couple e-commerce projects. I had a role in all phases of the process (Planning, Design, Development, Maintenance). The main tasks of the development phase were:

- Edit and create theme templates written on php/phtml and/or pure HTML/HTML5
- Give the desired appearance using CSS/CSS3/SASS
- Implement interactivity and effects using Javascript/jQuery

During these years I achieved significant experience in web design fundamentals, UI development, UX principals and accumulated “Flight hours” working on real projects.

---

## 06/2008-06/2013: **Technical Support/Customer Service**

Worked at SITEL IBERICA S.A. and TELETECH ESPAÑA occupying different positions including customer care, incidents management, sales, technical support and technical mentorship. In this first important part of

my professional life I achieved skills like *effective communication, team spirit* and *troubleshooting technics*. Skills that proved to be very important in later phases of my career.

---

**10/2005-09/2007: Sales** at A.P. CHRISTAKIS EDITIONS

Wholesale and retail. Responsible for central Greece and islands. Receiving and preparing orders from bookshops but also face to face sales to individual customers.
